IAESTE JAPAN

1. About IAESTE

1. What is IAESTE?

IAESTE is an international non-governmental organization that promotes internships abroad in a wide variety of professional fields, mainly in **STEM fields**, but also in management, marketing, etc. "IAESTE" is an abbreviation for the International Association for the Exchange of Students for Technical Experience.

It aims to train engineers with a broad international perspective and has been active mainly in Europe since its foundation in the UK in 1948.
All internships are conducted in English.

These internships take place in overseas laboratories or companies, where interns make use of the specialized knowledge they have acquired during or after their university studies. Interns are expected to engage in practical work alongside local colleagues, in a manner similar to that of regular staff. This is fundamentally different from study abroad programs, which are primarily intended for learning English or for studying a new academic field.

Students who submit their internship report within one month of completing their internship will be issued with an official IAESTE internship certificate. For more information, please visit the IAESTE Official Website (<https://iaeste.org>)

2. Glossary

Host institution: A company or university offering internship opportunities to students.

Offer: A prescribed format in which the host institution states the specialization and required skills of the student to be accepted, as well as the accommodation and accommodation to be provided.

Intern Candidate: A student who applied and successfully completed an interview with the IAESTE professor in charge. The right of an intern candidate to be an intern is valid as long as the student remains enrolled in a university in Japan.

IAESTE A.s.b.l.: A non-profit organization registered in the Grand Duchy of Luxembourg and the international umbrella organization for IAESTE. A.s.b.l. stands for "Association sans but lucratif".

Exchange Platform (EP): Offer publication and application system operated by IAESTE A.s.b.l.. Initial registration is required to use the system. Through this system, host institutions, national IAESTE offices and students exchange documents.

About the Internship Offer

The internship offer is provided in an A4-sized document titled “**INTERNSHIP OFFER.**”

A sample offer is shown on the following page.

Please read the instructions below carefully when reviewing the offer.

[Important] How to Read the INTERNSHIP OFFER (O-Form, Form-O)

- **Reference No.:**
Located directly below the title “INTERNSHIP OFFER.”
It consists of a two-letter country code followed by numbers.
The country name is indicated below the reference number.
- **INTERNSHIP HOST:**
Information about the host institution, including the name of the university or company, location, and website.
- **STUDENT REQUIRED:**
Specifies the required field of study, necessary skills, minimum academic year level, and language requirements with proficiency level.
- **INTERNSHIP OFFER:**
Provides details on the internship period, living allowance, payment method, accommodation, training content, and working hours.

INTERNSHIP OFFER DE-2025-2067-2

Detmold, Germany

ON-SITE

INTERNSHIP HOST

Name of Company
OWL University of Applied
Sciences and Arts - Technische
Hochschule Ostwestfalen-Lippe
Department 1

Website
<https://www.th-owl.de/>

Address of Company
Detmold
Germany

Number of Employees
600

Business or Product
Design, Architecture, Urban
Planning, Civil Engineering,
Traffic Engineering

STUDENT REQUIRED

General Discipline
Architecture; Computer
Science /
Informatics; Environmental
Engineering/Sciences; Web
Development / Software
Engineering / Computer
Programming

Field of Study
General; General; General; General

Completed Years of Study
2

Language Required
English Good (B1, B2) Or
German Good (B1, B2)

Required Qualifications and Skills
R Programming Language | Python |
Microsoft Word | 3D Design | Acoustics
Candidates should possess a solid
disciplinary background related to at least
ONE of the following areas:
(1) Parametric Architectural Design -
Rhino and Grasshopper; (2)
Programming, statistical analysis,
machine learning - Python; (3) Virtual
Reality - video editing and post-processing
- Unity & similar; (4) Geographic
Information Systems (GIS) to work with
noise maps. We value individuals who
can demonstrate strong analytical skills,
effective communication

Arranged by
IAESTE or on your own

Estimated Cost of Living including Lodging
992 EUR / Month

Working Environment: Research and development; Office
work

Working Hours / Week: 40.0

The Institute for Design Strategies (IDS) of the Detmold School of Design - TH OWL in Detmold, Germany is offering positions to support the research project "Building Acoustics and Urban Soundscape" focused on studying the relationship between building façades and people's perception of sound in cities.

The internship consists of supporting the research of human perception in cities, with a strong focus on sound and vision.

A successful candidate has experience in one or more of the areas required (Parametric design in Grasshopper / Statistics in Python / VR and game development / Noise mapping with GIS). A CV and portfolio showing the candidate's previous work is required. The internship is conducted in English.

ADDITIONAL INFORMATION

see additional documents

Deadline for Nomination - 15-Mar-2025

An offer from a German university
listed in the Form-O.

3. Exchange system and matching

IAESTE Japan exchanges internship offers with other IAESTE member countries on a one-to-one basis and matches the acquired offers with Intern Candidates. Likewise, member countries that receive internship offers from IAESTE Japan nominate and send students to host institutes in Japan. This exchange mechanism applies to internship offers classified as Exchange Internships.

In contrast, Global Internships are matched through the Exchange Platform without requiring a one-to-one exchange of internship offers between member countries.

Please note that matching does not constitute final acceptance of an Intern Candidate. After a match has been made, the host institute will review the candidate, and the internship will be confirmed only after the host institute has formally accepted the Intern Candidate and any other required procedures have been completed.

4. The two types of offers and their characteristics

Exchange Internship

IAESTE Japan contacts IAESTE member countries to obtain internship offers that match each Intern Candidate's preferences and qualifications, and matches one internship offer with one student.

The nomination documents will be submitted to the host institute by around March 15 (tentative and subject to change), after which the Intern Candidate must wait for the host institute's decision. If the application is not accepted, the Intern Candidate may continue the application process by searching for and applying for a preferred Global Internship offer, as described below.

It is not permitted to reject a matched Exchange Internship offer and change to a Global Internship. (Exceptions apply if a travel advisory has been issued for that country, etc.)

◎ Benefits

1. Offers are obtained on a case-by-case basis and there are no other applicants (competitors), so there is a significant chance that an internship will be confirmed.
2. Very high chance of being accepted if you have the necessary skills.

× Disadvantages

1. You cannot choose the country in which the internship takes place.
2. The details of the internship cannot be chosen, so the internship may not meet your expectations.
3. If there is no offer in the first-choice region that matches the desired field and desired duration, the second to fourth choice regions will be selected.

Global Internship (Only this offer type is available for applicants applying in April.)

The offers are published on the EP throughout the year and are viewable for intern candidates. If there are multiple applications for one offer, the most skilled student will be selected.

Many offers close two weeks after publication so nomination documents should be prepared promptly.

◎ Benefits

1. You can select your own offers from the offers published on the EP by looking at the country of interest, internship content, duration of internship, etc. as far as you fulfil the necessary requirements stated in the offer.
2. You can find offers from internship hosts that do not appear on Exchange Internship.
3. If no students matching the requirements are found, the offer is repeatedly published in the system.
4. Many computer science offers are available.

5. Remote internships are also published.

× Disadvantages.

1. The number of offers varies depending on the time of year: Usually it is highest from April to June, declines in the summer months and then increases in autumn and winter.
2. Offers for students who completed 2 years of undergraduate studies, or who major in biology and urban planning are relatively scarce: Exchange Internships are recommended for such students.
3. Some offers may be highly competitive due to the large number of applications. Particularly competitive are offers from Switzerland, Austria and Scandinavia.

2. Overview of IAESTE Internship

1. Field of internship

General science (including IT-related fields), business, marketing, etc. For more details, please refer to “Application Manual”.

2. Destination

Host institutions such as universities, research institutions or companies in IAESTE member countries.

Please note that there are few offers from North America and Oceania.

3. Duration of internship

Each offer specifies the possible internship period and its duration in weeks (see p.3). In the matching process, the internship period is currently one of the most important factors. Therefore, the broader the availability period indicated in your application, the more offers you may be matched with. This gives you a greater advantage, so setting your availability carefully is extremely important. Please read the following information thoroughly and consider the content of your application accordingly.

Conditions for Entry

Internship period: Must be between 8 and 52 weeks.

Internship start and end dates: Must cover at least two full calendar months (i.e., from the beginning of one month to the end of another), even if the total duration is 8 weeks.

Note: Germany strictly defines internship periods from the beginning to the end of a month. If you wish to intern in Germany, you must follow this rule. (You cannot start or end an internship in the middle of a month.)

Reference Information

(1) General Trends in Offers

Most offers are for 8 to 12 weeks. Offers for six months or one year follow in frequency.

Offers exceeding six months tend to involve more rigorous selection criteria.(1)

(2) Regarding Exchange Internships

Start Period:

- Most offers start between July and September, making them suitable for those wishing to intern during summer break.
- Offers starting after January of the following year are very limited. If you wish to start later, consider applying for a Global Internship instead.

On including August in the Internship Period:

- In Europe—especially in universities—August is typically part of the summer holiday, and internships are usually not possible during that time.
- For companies, it depends on the offer, but August is often excluded from the internship period. In regions outside Europe, there are generally no issues with internships during August.

(3) Regarding Global Internships

- Offers are published throughout the year. However, there tend to be fewer offers from European member countries during August.
- The situation regarding August availability is the same as for Exchange Internships

4. Accommodation

In many cases, accommodation will be arranged by the host institution or the local IAESTE office.

5. Language

Internships are conducted in English. In non-English speaking countries, the native language of the country of internship may be required in everyday life, so it is advisable to learn some of the language of the country of internship once you have decided on your host country.

It is advantageous to have skills in the native language of the internship country: German language skills are an advantage in Austria, Switzerland and Germany.

6. Amount to be paid to the Japan Office

	University member students*1	Non-member school students	Students with IAESTE internship experience
Application fee	6,000 yen	12,000 yen	0 yen
Internship administration fee*2	60,000 yen	120,000 yen	70% of the amount shown on the left

*1: The current university members are the following 15 universities.

Osaka University, Okayama University, Kyoto University, Keio University, University of Tokyo, Institute of Science Tokyo, Tokyo Metropolitan University, Tokyo University of Agriculture and Technology, Tokyo University of Science, Doshisha University, Tohoku University, Muroran Institute of Technology, Yokohama National University, Ritsumeikan University, Waseda University

If you belong to a university member school at either the time of application or the time of internship, the amount for university member students will be applied.

*2: After applying and completing an interview with the IAESTE professor in charge, you will be registered as an intern candidate. Registration is valid during the period of enrolment.

7. Costs of internship

(1) Travel costs:

You are responsible for your own travel costs.

Airline tickets should be purchased after the visa has been granted.

(2) Accommodation expenses:

The amount indicated in the Payment section of the O-form will be paid. You may have to pay your own expenses for leisure time and holiday excursions.

(3) Overseas accident insurance:

Students are responsible for arranging their own insurance. Insurance is compulsory.

(4) Visa:

You are responsible for the cost of obtaining a visa.

If a visa is required for the country of internship, the host country's IAESTE will prepare the necessary documents for visa application. You must then apply for and obtain the visa yourself.

8. Requirements for internship, etc.

(1) The host institution will examine your curriculum vitae (CV) and transcripts in English, so **you cannot apply for an offer that requires a field of study you have not completed.**

(2) If you wish to apply for internship in Architecture, you must have AutoCAD skills and submit a portfolio.

(3) Many host institutions in developed European countries require a minimum of 3-4 years of undergraduate completion, and many countries include a web or telephone interview during the acceptance screening process.

(4) In Switzerland, doctoral students cannot undertake internships.

3. Intern Placement Record

By Host Country

	2021	2022	2023	2024	2025	total
